

**What is the
content you're
designing?**

A dynamic background for my chat-application

What is the intended form of your project?

A generative background design system that changes based on a user-interaction (could be time of day - no or word use)

#Find #Call #Buy #Transcribe

Why is this done in code?

Chat Interfaces look bland and banal, giving users control

WhatsApp - <http://bit.ly/2fYsKqh>

Facebook Messenger - <http://bit.ly/2ggdupz>

Poncho - improvement - yellow/blue - <http://poncho.is/>

I want to change that by bringing aesthetic backgrounds relevant to the conversation
